2021年4月・2020年9月入学東京工業大学大学院修士課程・専門職学位課程

志望理由書

氏名	HAN CHAO	志望する系又は 専門職学位課程	情報工学系

I am working in Tokyo as a system engineer currently, I am really interested in MIDI music production and Artificial intelligence technology, I believe that the AI will keep catapulting growth in the music industry. Therefore I plan to enter a graduate school to learn and research related topics professionally.

I haven't identified specific research theme yet. Generally, rather than stay in theory, I plan to make an application that can be provided to users, like a sound conversion online platform, a music generation model based on deep learning and so on. At least I hope to make some contributions to the efficien music creation with the power of AI.
